On your Mobile Phone

1) Go to Apple Store or to Google Play

2) Install the App (it takes less than a minute)

#### Part 1: Equipment Specification and Quotations

During the Team visit to Jordan, from left to right: Breget, Zeineb, Tarek, Hazem, and Atef Photo by Naser Almanaseer

## Annex 1:Equipment and specifications

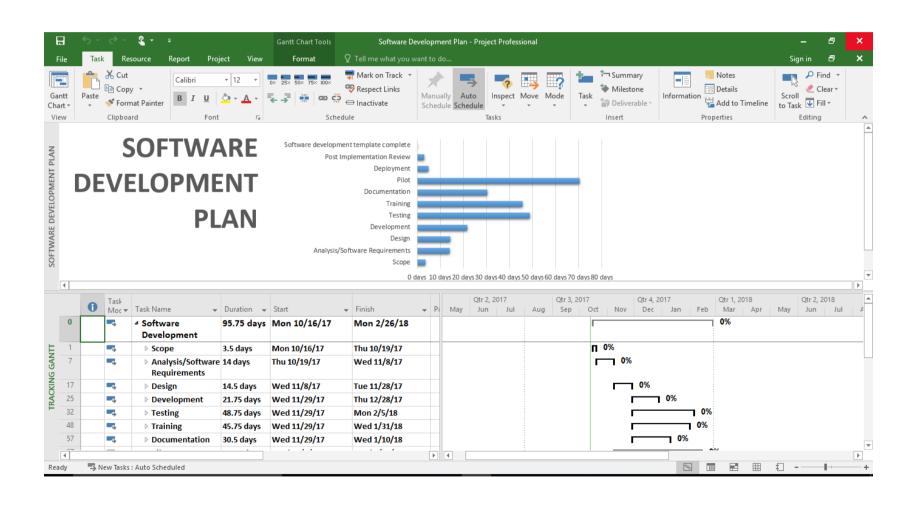

#### **ABSTRACT**

This document is prepared by MIMIr
Team at Al-Balqa' Applied University, one
of the project partners, to provide
technical specifications for equipment
needed for the project. The funding is by
Erasmus+ CBHE Action 561548-EPP-12015-1-ES-EPPKA2-CBHE-SP, and the
project is coordinated by Barcelona
University in Spain.

## Planning the Job; utilize local experience and resources

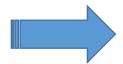

#### Part 2: BAU Platform Development

#### **BAU Platform: Planning**

- Assess existing situation (national report)
- Define Indicators
  - Stakeholder consultation (within BAU)
  - Study visits and Roundtables (Within MIMIR)
  - Transferrable European Innovation and Research Management Practices (Hand Book). (Within MIMIR)
- Identify Modules (list of modules)
- Identify Needed infrastructure (Hardware, Human Resources).
- Preliminary approval by BAU top management.

**Concept Model for Platform at BAU**

#### BAU Platform; The Concept

Innovation and Research Information System (IRIS)

We have features for every step of the way

Innovation and Research Information System (IRIS). IRIS is a pilot-style, database-construction project platform for Information and knowledge sharing and exchange Innovation Research and Development (IRD) for target groups and stakeholders in BAU.

platform, Information, and exchange

#### Three Designing Phases

- Coding prototype
- Evaluation (assessing System Performance).
- Evolution (System Debugging & Maintenance)

Human Resources, Institutions, Publications, etc. ...

#### IRIS System Modules

- Human Resources
- Institutions
- Publications
- Projects
- News
- Events & Meetings
- Facts and Figures
- Links Module
- RSS Module
- Job Opportunity
- Good Practices
- Country Reports
- Laws and Regulations

#### Definitions for selected modules

Publications (Documents)	This module keeps track of publications authored by researchers. Each publication has specific data such as abstract, authors, keywords, etc.
Projects  Human Resources	This module keeps track of the projects in which Institutes participate in.  Projects are identified by title, funding agents, and objectives.
	A web based system of multi lingual capturing and disseminating information about personnel in the research sector in BAU. This Module keeps track of the researchers of the IRIS
Institutions	This module presents basic information about institutions in Jordan such as name, address, goal, achievementetc.  The IRIS system provides a backend for storing/update institutions' data and a front end for browsing and searching.

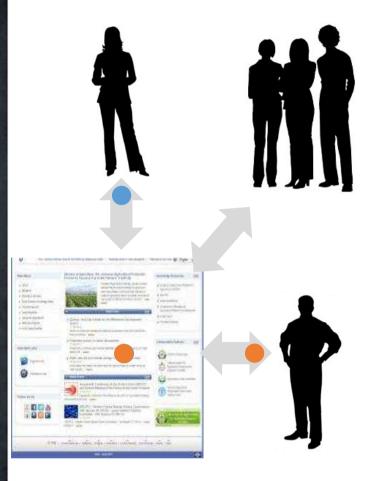

### <u>Application</u> Interfaces

#### **Front end Interface**

The front end components provide the information browsing and retrieval functionalities, and are available to any site user

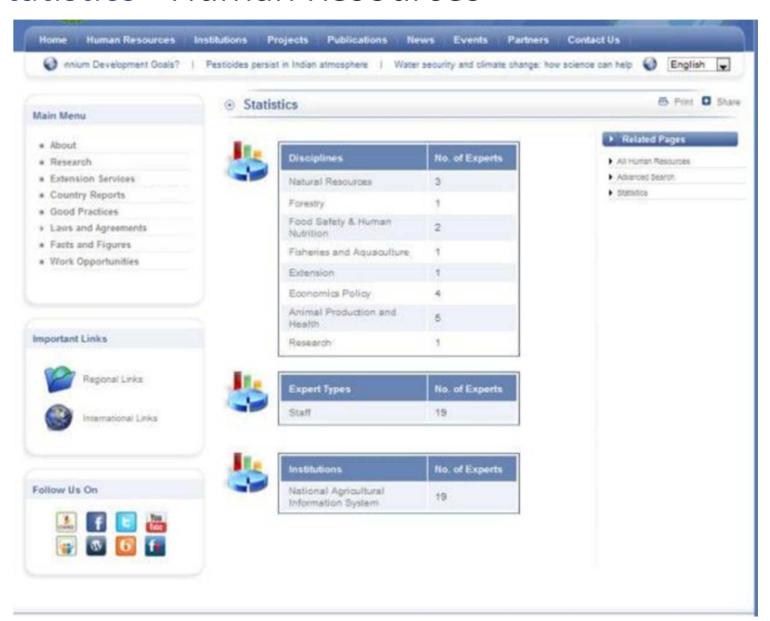

#### **Back end Interface**

The backend components provide the data management functionalities that enable system administrators to input/update/delete data items into the NAIS database. These components are accessible by system administrators only

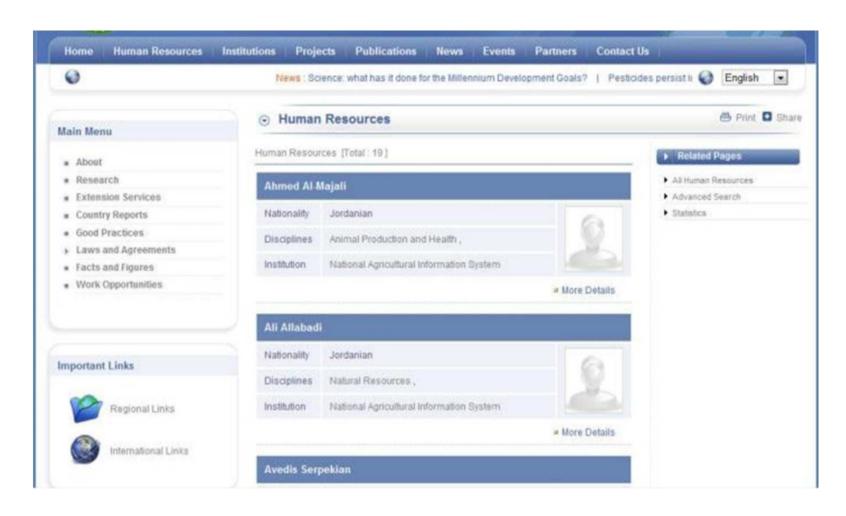

#### **Statistics - Human Resources**

#### Browsing Modules - Projects

#### Browsing Modules - Human Resources

#### **Example Data- Human Resources**

#### Management – Back end

#### Browsing Modules – Back end

#### **System Management Level - Users**

Sarvay Way & Many a Way a way

#### Level 1

User Name	Responsibility				
1- BAU Administrator	<ol> <li>BAU administrator who is responsible for</li> <li>Adding/Deleting/Editing/Export XML and View Institutions.</li> <li>Assign College Administrators to institutions.</li> <li>Add alternative languages to the institution.</li> <li>Add/Edit/Delete/View other modules as Country reports, Good practices, Laws and regulations, Links, RSS, Export XML files and Data Registrant.</li> <li>translate the backend and frontend interfaces to different languages</li> </ol>				

#### Level 2

User Name	Responsibility				
	The college Administrator is assigned by BAU				
	Administrator to administrate delegated institutions				
	and is responsible for				
	1. Adding/Deleting/Editing//Export/View				
	Institutions under his authority.				
	2. Add alternative languages to the College				
2- College Administrator	3. Assign Institution Data Entry to institutions.				
	4. Publish/Reject/Delete/Edit and view Publications,				
	Projects or Experts sent by Institution Data Entry.				
	5. Publish/Reject/Delete/Edit and view other				
	modules as About, Focal points, Events, News,				
	Links and Page creator sent by Collage Data Entry.				

#### Level 3

User Name	Responsibility
	The Data Entry is assigned by College administrator
	to institutions and is responsible for
	1. Add Projects, Experts and Publications, About,
	Focal points, Events, News, Links and other modules under his authority.
3- Data Entry	2. Update/Delete Projects, Experts, Publications, About, Page creator and Links that are added but
	not yet sent to Collage Administrator.
	3. Send all items to College Administrator for approval.
	approval.

# Virtual Platform South-South collaboration

# DESIGNING AND IMPLEMENTING OF VIRTUAL PLATFORM IN PARTNER INSTITUTIONS - CONCEPT NOTE

Submitted by

MIMIr Team

Al-Balqa Applied University, Jordan

As part of the activities of Modernization of Institutional Management of Innovation and Research in South Neighboring Countries October 2017

#### Prefac

Modernization of Institutional Management of Innovation and Research in South Neighboring to empower management of innovation and research at these institutions. This approach will collaboration in idea generation, data flow, and innovation in general. Based on the progress of the project represented by study tours and roundtables conducted by the project at several According to the project settings, partners are granted almost equal resources to achieve this roundtable held in Amman back in July 2017, partner institutions preliminary discussed the possibility of collaboration between partners from Jordan and Morocco on the issue of virtual platform development, and assigned BAU and Mohammad IV to take the responsibility in this Countries - MIMIr is a project coordinated by Barcelona University and funded through ERASMUS +. Establishing virtual platform at partner institutions is one important intervention allow for knowledge transfer and exchange, and therefore the proposed virtual platform will be implement to invest in the existing experience and improve it to allow for further dynamic partner institutions, the necessity of functional and effective virtual platform become evident. Despite the limitations in both the allocated resources and time, MIMIr Team at Al-Balqa Applied University (BAU) made significant steps toward implementing this task. During the particular assignment. Consequently, this document presents draft concept on the possible collaboration between BAU and partner institutions in Morocco and Jordan toward the specific task. However, the initial conditions in terms of innovation and research management varies among different partner institutions. Hence, customized interventions is unavoidable. development of customized virtual platform.

#### 1. TASKS

# Task 1: Planning

This task focus first on performing system-analysis to fully understand the current situation of innovation and research at partner institution. This analysis will partly utilize information presented in the national report prepared earlier by the Jordanian and Moroccan partners.

#### **Work Plan and Timeframe**

Task	Deliverable	Contributor	Time
Planning	Inception Report Hardware specifications Software specification	BAU	
Diatform Docign	List of indicators List of Modules	BAU and partners	
Platform Design	Code Prototype	BAU	
Dissemination	Lunching event Awareness	BAU	
	Integration	Partners	
Capacity development	On-job training	BAU	
Replication and Upscaling	Customized virtual platform at partner institutions	BAU	
Impact Assessment	Impact report	BAU	

#### Thank you

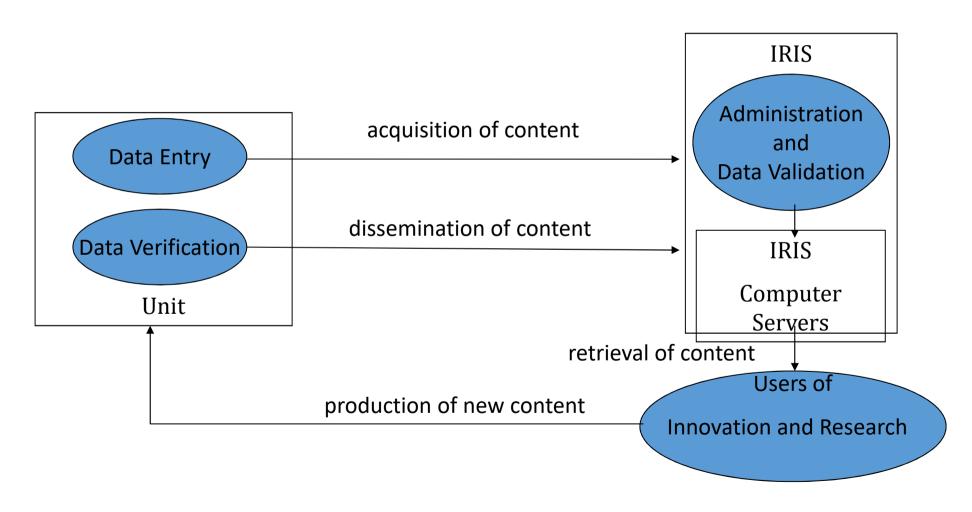

Country Report Module	It is concerned with country reports concerning all issues related to Innovation and Research			
<b>Good Practices Module</b>	It is concerned with displaying successful Innovation and Research case studies.			
Links Module	It displays related links to this System.			
RSS Module	It is concerned with exchanging information between different applications.			
News and Events Modules	They are concerned about displaying News and Events about Ministry of agriculture and any Innovation and Research issues.			

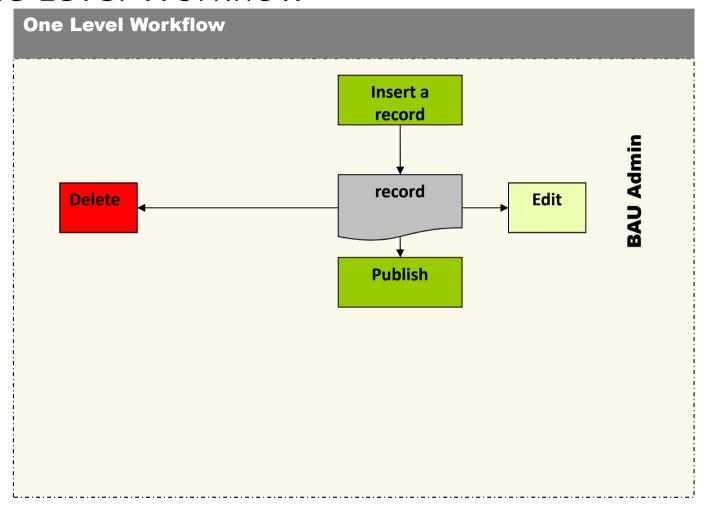

Collaborative Partners Module	It is concerned about Collaborative partners cooperating with ministry of higher education as an example financing projects.
Job Opportunity	Job Opportunity allows Universities to announce available jobs needed.
Facts and Figures Module	It provides facts and figures about Innovation and Research sectors.
